2.2	New Features	4
2.3	Bug fixes	4
2.4	Known issues	4

1 Twonky Ref App iOS

1.1 New Features

- added DIAL support to discover Fire TV

1.2 Known issues

- 'Shuffle' and 'Repeat' icons available when image slideshow is beamed
- DMR control shows black screen while playback continues when leaving video view and coming back to it
- DNLA content duration doesn't update correctly
- DTCP content playback stops when user performs seek
- DTCP content playback stops when user resumes paused playback
- app crashes when it downloads a content after sleep
- app freezes if user taps [Select All] and [Clear Queue] continuously
- deleted SSO account does not expire in secondary device without restart
- pause does not work when beaming DLNA content to Sony TV
- removing account will not remove online items from queue list
- seeking forward to the end of the song stops playback on Apple TV
- shuffle doesn't work with Facebook content
- shuffle is not working when beaming content from DLNA server
- state restoration is broken in iOS 8.3
- when iPhone goes to sleep queue list gets cleared
- wrong status for download after app resumes

2 Twonky Ref App Android

2.1 Development Environment

Please note that the Twonky SDK for Android now requires Android Studio (no longer Eclipse) as a development environment, which is now state of the art for Android development. For further details please have a look at the latest developer guide.

2.2 New Features

- added DIAL support to discover Fire TV

2.3 Bug fixes

- fixed 'Retry' option that did not work when user re-tried to download a downloading-failed content

2.4 Known issues

- local renderer setting remains disabled after setting it private in general settings on Android
- local video is shown with wrong aspect ratio
- user cannot resume to play the content after sleep
- volume cannot be controlled when content is beamed to Samsung TV
- DTCP content playback stops when user performs seek
- DTCP content playback stops when user resumes paused playback
- deleted SSO account does not expire in secondary device without restart
- pause does not work when beaming DLNA content to Sony TV
- seeking forward to the end of the song stops playback on Apple TV
