1 Overview

Version 8.1.2 is a security update only.

Some security issues have been identified in the REST APIs of the control point that is embedded in Twonky Server since 7.0.

2 Security Fixes

- fixed security issues outlined in [CVE-2015-6505](#).

3 Known issues

- LG TV Series 6 does not displays video subtitle of a video when advancing automatically to the video in a queue
- audiobooks cannot be aggregated
- duration calculation of MPEG2TS files is not accurate if timeseek generation is disabled
- media item can be duplicated following a change in its metadata
- mp4 thumbnail generation is broken
- UPnP inspector gets confused when Twonky Server provides multiple artist tags with different roles
- error in Mac OS logs for filedb-delete is actually only a warning; operation is not impacted
- occasionally, Twonky license key input results in "invalid key" on Linux systems
- workaround: remove the appdata folder and try again
- thumbnails of some rotated images do not show up correctly in webUI
- sometimes webUI with Opera does not show any thumbnails
