# 1 New features

No new features have been added in this version.

---

## 2 Improvements

No improvements have been added in this version.

## 3 Bug fixes

- fixed a problem where Twonky Server lost track of all downloaded content after upgrading or reinstalling
- Twonky Server now cleans up all temporary files after upgrades
- fixed HEAD request in certain condition on LPCM content (leads to random CTT 7.3.33.2 failure)
- fixed a problem where Twonky Server would never stop to scan content
- retain now twonky-locations.db on database rebuild (keep location related settings)
- fixed a bug where Twonky Server failed to share UNC network shares

## 4 Known issues

- updating from 7.x to 8.0 with preserve settings leaves some files in c:\
- sometimes content from USB drive is not indexed by Twonky Server unless the server is restarted
- sometimes servers available for aggregation are not discovered
- audio album art is broken when installing Twonky Server 8.0.1 with "preserve settings" over 7.2.8 on Windows
- sometimes content from USB drive is not indexed by Twonky Server unless the server is restarted
- multi-user
  - container album art for multi-user content is broken
  - duplicate removal in multi-user mode does not work as expected
  - nested folders can cause issues with multi-user setup
  - restricted permission to multi-user content is signaled as no content shared
- webUI
  - playing or beaming a container in By Date navigation results in "container empty" message
  - thumbnails of some rotated images do not show up correctly in webUI
  - sometimes webUI with Opera does not show any thumbnails

---

## 5 QA information

CTT 2.0.3.8 passed

MCVT 3.0.3.7 passed

UPnP CTT 2.0.60 passed
