3	Known issues.....	5

1 Overview

Some security issues have been identified in the REST APIs of the control point that is embedded in Twonky Server since 7.0.

2 Security Fixes

- fixed security issues outlined in [CVE-2015-6505](#).

3 Known issues

- LG TV Series 6 does not display video subtitle of a video when advancing automatically to the video in a queue
- Roku does not support seek for music
- SDK allows to beam media items with unsupported DLNA profiles as it only matches mime types
- Twonky Server interferes AirTunes playback with Denon AVR-4311, as workaround disabling AppleTV support with `disable_dmr_plugins=1` solves this
- beaming media from Mediatomb to Samsung TV D series does not work
- multi-user content cannot be beamed to remote Twonky renderer
- changes in `twonky-startup.txt` does not have any effect if application is upgraded in place on iOS
- cannot beam multiple items to Xbox One
