

Twonky Client 8.0.2

Bug Fixes

- fixed beaming of slide shows to Roku in bad network conditions (e.g. slow networks)
- slideshow delay was longer than 5s after manual skip fixed discovery issues
- fixed OutOfMemory exception leading to application crash
- fixed a problem where Twonky Server lost track of all downloaded content after upgrading or reinstalling

Known Issues

- CTT fails for DMC test 7.3.26.2 (bug filed with DLNA)
- Twonky Proxy sometimes discovered as server
- issues with XBMC and picture beaming
