

Twonky Server 8.0.2

Bug fixes

- fixed a problem where Twonky Server lost track of all downloaded content after upgrading or reinstalling
- Twonky Server now cleans up all temporary files after upgrades
- fixed HEAD request in certain condition on LPCM content (leads to random CTT 7.3.33.2 failure)
- fixed a problem where Twonky Server would never stop to scan content
- retain now twonky-locations.db on database rebuild (keep location related settings)
- fixed a bug where Twonky Server failed to share UNC network shares

QA information

CTT 2.0.3.8 passed
MCVT 3.0.3.7 passed
UPnP CTT 2.0.59 passed

Known issues

- sometimes content from USB drive is not indexed by Twonky Server unless the server is restarted
- sometimes servers available for aggregation are not discovered
- audio album art is broken when installing Twonky Server 8.0.1 with "preserve settings" over 7.2.8 on Windows
- [multi-user](#)
 - [container album art for multi-user content is broken](#)
 - [duplicate removal in multi-user mode does not work as expected](#)
 - nested folders can cause issues with multi-user setup
 - restricted permission to multi-user content is signaled as no content shared
- [webUI](#)
 - [playing or beaming a container in By Date navigation results in "container empty" message](#)
 - thumbnails of some rotated images do not show up correctly in webUI
 - sometimes webUI with Opera does not show any thumbnails
