

Twonky Server 8.5.2

New Features

- added soundex algorithm for search

Improvements

- added sample frequency and bit per sample for resource xml
- improved scan_compilation_flag INI setting to let the Albumartist metadata tag be prioritized

Bug fixes

- fixed issue with RIFF chunk parser
- fixed metadata read problem for RF64 files larger than 4 GB
- fixed password obfuscation and RPC security issues
- fixed pausing issue for OPPO Sonica
- fixed wrong duration parsing for RF64

Known Issues

- logging checkbox can't be enabled in web ui
